

Direct Care is a patient-centered healthcare model. In Direct Care, insurance bureaucracy, fees, and miscommunication are removed from the conversation. This approach restores the doctor-patient relationship and builds trust. It allows you and your doctor to both focus on improving your vision and your health.

As insurance regulations become more burdensome, many doctors are stepping away from the mainstream healthcare system and joining the ranks of Direct Care providers. Doctor Bontrager is proud to join these healthcare professionals who are challenging the status quo. Together, we are restoring excellence, relationships, transparency, and accessibility to healthcare.
